Project Details:

Name: Bank management system

Description:

A simple banking system project is a simple project developed using Python. The project contains only the admin side. The admin manages all the basic functions, including creating a new account, viewing the account holder's record, withdrawing and depositing amounts, balance inquiries, and so on. In this project, there is no such login system. This means he/she can use all those available features easily without any restriction. It is too easy to use, the user can check the total bank account record.
